# Wayra Tata

Cultivated by David Gonzalez. Named by Richard O'bannon. One of the bluest.

W

# Weird Worm

Per Richard O.: "This is from my friend João Vianna in Brazil, whom I imported it from. It is a strange one with weird monstrose and variegated growth. The "weird" part is fickle and can be prone to fungal issues so hit it with Mancozeb! Weird Worm likes to be isolated for it's unusual looks so have grafting stock ready."

# Zelly (Scopulicola x Variegated Red Grandiflora)

"Zelly....." Scop x VRG (Scopulicola x Variegated Red Grandiflora)

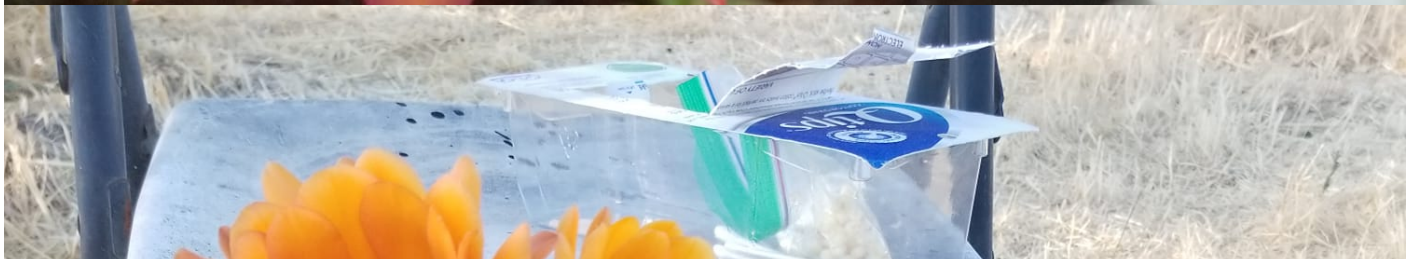

This beautiful plant with a deep green look when grown in shade. with tightly dense spines and beautiful flowers with a wide range of colors. There are many different "Zelly" Scop x VRG with a variety of characteristics. Some sown seeds show variegation. The one above has none. It was one of the first to come out back in around 2015 (rough guess.) Crossed and named by [Misplant.net](https://misplant.net)

Can be variegated all the way to “banana” with no or almost no green.

Flowers also vary greatly.
